

INTRODUCING 3FLEX™. THE ONLY USDA-APPROVED COMBINATION PACKAGE FOR PORCINE CIRCOVIRUS, MYCOPLASMA HYOPNEUMONIAE AND PRRS.

Boehringer Ingelheim Vetmedica, Inc. brings you the 3FLEX™ combination package, the first 3-way combination approved by the USDA to be mixed and administered as a single shot for pigs three weeks of age or older.

EASY AS 1-2-3

By mixing and administering Ingelvac CircoFLEX® 1, Ingelvac MycoFLEX® 2 and Ingelvac® PRRS MLV 3 in one 2 mL shot, you're protecting your herd against three of the most critical diseases in the Porcine Respiratory Disease Complex (PRDC) and the swine industry. You're also reducing stress on pigs and people, and reducing labor costs.

3FLEX IS EFFICACIOUS

Independent and double-blinded trials confirm the efficacy of the 3FLEX vaccine mixture against single and multiple infections by challenging vaccinated pigs with single agent pathogens and all three pathogens simultaneously.^{1,2,3}

3FLEX™ - PROVEN EFFICACY IN CHALLENGE TRIALS

Efficacy Parameter	3FLEX	Control	P-value
PCV2 Lymphoid Depletion ¹	0/24	20/24	P<0.0001
PCV2 IHC POS/ Lymph Node ¹	2/24	22/24	P<0.0001
<i>M. hyo</i> Lung Pathology ²	3.8%	10.6%	P<0.0078
PRRS Lung Pathology ³	4.5%	32.9%	P<0.001

3FLEX IS SAFE

Field studies in three geographic locations were conclusive: The 3FLEX vaccine mixture administered as a single 2 mL IM shot to 672 pigs at approximately three weeks of age was proven safe, and no systemic or local (injection site) reactions were observed.⁴

3 VACCINES. 1 SHOT.

3FLEX offers the performance and benefits of Ingelvac CircoFLEX® 1, Ingelvac MycoFLEX® 2 and Ingelvac® PRRS MLV 3 in one convenient shot.

Ingelvac CircoFLEX® 1

The leading Porcine Circovirus vaccine in the United States. Proven safe and effective. Approved for use in pigs three weeks of age or older. Offers a duration of immunity of at least four months.

Ingelvac MycoFLEX® 2

Delivers protection from *Mycoplasma hyopneumoniae*. Approved for use in pigs three weeks of age or older. Safe and effective, with a duration of immunity of at least 26 weeks.

Ingelvac® PRRS MLV 3

Approved for the reduction of respiratory disease associated with Porcine Reproductive and Respiratory Syndrome (PRRS) virus in pigs three weeks of age or older.

3FLEX IS THE SMART CHOICE

The economic advantages of one 3FLEX shot versus three or more separate shots are obvious. It saves time and money by reducing labor costs associated with handling and treating pigs multiple times, making it the smart choice.
